# IT Network Solutions

Techvalley is a leading structured premise network cabling designer and installer in India. Our extensive engineering and technical background, combined with years of experience, allows us to provide our clients with an unsurpassed level of service and support. Experienced project management team works closely with clients to ensure projects are completed on time and within budget. Each installation is tested and certified by trained quality-assurance engineers and technicians. Final test results are documented and submitted to clients after project completion. An on-going comprehensive training program provided by leading data communication equipment manufacturers and leading industry organizations ensures that our staff stays abreast with the latest in technology and services.

**TECHVALLEY LLP offers a portfolio of solutions including but not limited to:**

1. Site surveys, design and engineering
2. Turnkey network installation
3. Network active installation and configuration
4. Cabling and active component maintenance
5. Network testing and troubleshooting
6. Project management and planning
7. CAD documentation
8. Network system certification

# Life Safety & Security Systems

Techvalley LLP provides integrated security services for monitoring the security and operation of buildings and their infrastructure. Integration of modern video and communication technology makes it possible to not only monitor complex and fault-critical building management systems across India, but also remotely control access systems and installations. If required, appropriate intervention measures can also be initiated. This facilitates round-the-clock supervision of building infrastructure and security systems within the customer's facility and other mission critical environments / infrastructure.

**TECHVALLEY LLP offers a portfolio of solutions including but not limited to:**

- Surveillance system
- Access Control system
- Boom barrier / flap barriers / turnstile / mantrap / bollards / crash rated bollards / UVSS
- Intrusion detection system
- Guard tour system
- Public / emergency notification system
- Fire Detection and Alarm system
- Fire fighter telephone system
- Fire Suppression (gas based) system
- Fire Suppression (water based) system
- Fire Suppression (foam based) system
- Electrical / Control panel fire suppression system
- Kitchen fire suppression system

# Critical Process Rooms / Control Rooms / Buildings
